

THE GLENDALE CHAMBER OF COMMERCE

Our training Luncheons have been very successful and many businesses have asked for a session on Websites. The subject we are going to address is basic design principles, the importance of a website to your business, layouts, selling your image and drawing people in. Want a do-it-yourself program? They will make that option available to you, as well.

Don't miss this one! It is being presented by Dan Crask - D & A Design

"When we entered the Cincinnati, Ohio branding and design picture we set out to be a small business that provides big ideas for huge success. We figured in small business, it takes one to know one. To separate our way of doing branding and design from everyone else, we grounded our business model in what we call practical humility: We listen, think, create, and serve."

Basic Website Design Principles

**March 30th, Tuesday, 11:30 am
Iron Horse - Upstairs**
